StealthWrap™

Ultra Durable Cartoning Solution

Secure and Confidential Cartoning

StealthWrap™ creates a ship-ready parcel whilst eliminating excess packaging, reducing total costs and improving package security - all without compromising on performance.

RE-THINK THE BOX

StealthWrap™ is a revolutionary high performance, ultra-durable cartoning solution that replaces traditional corrugated outer cartons with a 99.9% opaque shipper.

OPTIMISES SHIPPING COST

StealthWrap™ significantly reduces the dimension and shipping cost of the package. By eliminating the outer carton and replacing with StealthWrap™ freight costs can be reduced by up to 18%.

IMPROVES FULFILMENT VELOCITY

Reduces labour costs in the packaging workflow by increasing throughput velocity by 20 times or more.

ENABLES SPACE SAVINGS

Storing conventional packaging material can take up valuable space. One roll of StealthWrap™ can eliminate up to 1000 boxes, along with removing the need for secondary packaging materials such as tape and void fill materials, considerably reducing storage space required.

SUPPORTS SUSTAINABILITY INITIATIVES

Enables remarkable sustainability benefits, with significant packaging source reductions frequently exceeding 80%.
